Irrigator Tech Free Trade Show 'Spectacular'

More Than 500 Attend Chino Fairgrounds Event

Irrigator Technical Training School held its Annual Trade Show Sept. 15, 2005 at Chino Fairgrounds. This was a new and larger venue for the big show that offered FREE training classes, product demos, free food and beverages, raffles and more. More than 500 Green Industry professionals attended what one attendee called “a spectacular event.”

Classes were continuous all day long, and included Lighting, Drip Irrigation, Erosion Control, Pipe Sizing Basics, Smart Controllers, Water Management, Irrigation Efficiency, Valcon Central Control, Fertigation, and more. Free IN-N-OUT Burgers were

again provided by Irrigator Tech to all attendees.

Irrigator Tech is an active CLCA member with relationships with many major Green Industry suppliers. Many of them had information booths either indoors or outdoors at the big September event.

More photos on page 8

“This was our most successful Trade Show ever,” said Richard Daigle, Irrigator Tech Director/Instructor. “And from the comments we received from show attendees, these suppliers and contractors are already looking forward to our 2006 Trade Show later this year.”

The weather couldn't have been nicer for the outdoor event at the Chino Fairgrounds.

Mike Baron and Joe Kissinger of Walla Walla Sprinkler and CLCA greet attendees.

Free In-N-Out burgers are always a big bit.

Espectacular Feria Gratuita de Irrigator Tech

Asistieron al Evento Más de 500 Profesionales

La Escuela Irrigator Technical Training School sostuvo su Show Ferial Anual el 15 de Septiembre de 2005 en el predio ferial de la ciudad de Chino al cual asistieron más de quinientos profesionales de la industria verde. En este nuevo y gran espacio ferial, Irrigator Tech pudo ofrecer clases de entrenamiento GRATUITAS, demostraciones de productos, rifas, comida y bebida gratis, y mucho más; haciendo que este evento fuera catalogado como de espectacular por sus concurrentes.

Las clases fueron dictadas de forma continúa a lo largo de todo el día, e incluyeron Iluminación, Irrigación por Sistemas de Goteo, y Controladores de Riego Inteligentes, solo para mencionar algunas de las clases.

Imposible dejar de mencionar a las deliciosas hamburguesas IN-N-OUT que fueron proveídas GRATUITAMENTE por Irrigator Tech.

“Esta ha sido la feria de exposición y entrenamiento más exitosa que hemos tenido,” dijo Richard Daigle, Director e Instructor de Irrigator Tech. “Y por el comentario que he recibido, ya hay quienes están viendo con ansias el poder participar en la feria que tendremos a fines del 2006.”

Richard Daigle
Director/Instructor
Irrigator Tech

From the Director's Desk

Irrigator Tech has taken us to many new places in this past year. In recapping 2005, we have opened numerous new teaching sites, adding three new states to our regular traveling schedules. We have come a long way and intend to keep on going further with our growth and expansion in this New Year.

Online University Expands We have once again expanded our Online University to include the new Class #50 – Basic Irrigation Technician Certificate Renewal Class – which is also currently being taught in

person as we travel around the country. This new class will keep all the previously certified students of Classes 1 to 4 up to speed with the industry changes and advances in technology. The class is also mandatory to keep a current certification. In addition to the Renewal Class we have expanded our Basic Irrigation Classes to include Class #5 – Pipe Fitting and Maintenance, and Class #6 – Irrigation Field Hydraulics. Call or see Website for dates and locations.

Thank You, Students! I would like to join Marcie and our staff in saying THANK

Students learn about Fertigation and smart irrigation controllers.

YOU to our students. I travel over 50,000 miles a year, teaching over 180 classes. When I step in front of you there's a kind of magic that takes place. Yes, we all come away with new knowledge, but equally important are the relationships that are developed, for which I am truly grateful.

Desde el Escritorio del Director

El 2005 Fue un Año Próspero Irrigator Tech nos ha llevado a numerosos sitios nuevos. Recapitulando el año pasado, nosotros hemos abierto numerosos nuevos sitios de entrenamiento y hemos sumando tres nuevos estados a nuestra agenda regular de viaje. En suma hemos recorrido un largo camino para llegar hasta aquí y pretendemos mantenernos en movimiento con nuestro crecimiento y expansión en este nuevo año.

La Universidad Online se Expande Hemos expandido nuestra Universidad Online para incluir la Clase #50. Esta clase es para todos los aquellos estudiantes que han obtenido previamente su certificado de las Clases 1 a 4, para ponerse al tanto de los cambios y adelantos tecnológicos en la industria. Esta clase también es obligatoria para mantener la certificación al día, con la Clase de Renovación hemos expandido nuestro Curso de Básico de Irrigación para incluir la Clase #5, Colocación y mantenimiento de

tuberías de Irrigación, y la Clase #6, Hidráulica de la Irrigación de Campo.

¡Gracias, Estudiantes! Quiero unirme a Marcie y a todo nuestro personal para agradecer a nuestros estudiantes. Yo viajo unas 50,000 millas al año, para poder dictar cerca de 180 clases. Y sé que cuando me paro en frente de ustedes la magia comienza, y que todos hemos vuelto de estos viajes con nuevos conocimientos y amistades. Una vez más – ¡Gracias!

The Pro-C Can Expand to Handle Any Job

You're already familiar with *one size fits all*. Allow Hunter to introduce *one fits all sizes*. Thanks to its modular design, the Pro-C is the controller you can "build" to suit your needs. Every Pro-C starts with a 3-station base unit, to which you add additional 3- or 9-station Easy-Lock™ modules to create a controller as large as 15 stations. Choose just the size you need...and have the ability to expand later. Plus, inventory is a breeze. All you need to stock are indoor and outdoor base units, and the two different sizes of modules.

Mobile Classroom and Display Trailer Debuts

In our fifth year of bringing quality, hands on education to the Green Industry, Irrigator Tech has recently introduced our new Mobile Classroom and Display Trailer. Now offering classes at dozens of locations in seven states, we have become synonymous with practical, “in the trenches” training for irrigation and landscape contractors.

Richard's happy, now that teaching displays can remain intact and not have to be taken apart after each class.

We started by holding classes at our headquarters classroom in Chino, California, and soon expanded our teaching sites to

include “on the road” locations for convenience to our customers. Today, most of our classes are mobile, held at local distributorships or hotels close to the customer base. Our new Irrigator Tech Mobile Classroom and Display Trailer is a self-contained unit and is an integral part of the class training. Sponsor products and services are prominently displayed at the classroom site

all day with sponsor products, equipment and service displayed and demonstrated inside and outside the trailer.

Thank you, Sponsors for helping to make our new teaching trailer a reality.

Our current Trailer Sponsors include: HydroScape, Horizon, Dawn Industries, Weathermatic, RainMaster, Ewing, and StayGreen, Inc. Additional Sponsors are welcome. Don't miss this opportunity to have your brand vividly displayed on our attention getting, new Irrigator Tech Mobile Classroom and Display Trailer. Call us today for more information.

Debut del Trailer con Aula Móvil y de Exposición

En nuestro quinto año de traer calidad, educación práctica en la educación en la Industria Verde, nosotros en Irrigator Tech presentamos una nueva Aula móvil y de exposición. Una herramienta que ahora nos permite ofrecer docenas de clases en diferentes localidades en siete estados, poniéndonos en la “trincheras” del entrenamiento en irrigación y para los contratistas.

Nosotros comenzamos dictando clases en

nuestras aulas sede en Chino, California. Hoy en día la mayor parte de nuestras clases son móviles y se ubican en los locales de los distribuidores u hoteles que queden cerca de nuestros clientes. Nuestra nueva Aula Móvil es una unidad auto contenida y es parte íntegra de las clases de entrenamiento, permitiendo exhibir los productos y servicios de nuestros patrocinadores durante todo el día dentro y fuera del aula de

manera prominente.

Estamos buscando patrocinadores adicionales que deseen unirse a nosotros en esta tarea educativa que nos lleva a través del Oeste del país. Nuestros actuales Patrocinadores de nuestra Aula Móvil incluyen a: HydroScape, Horizon, Dawn Industries, Weathermatic, RainMaster, Ewing, y StayGreen, Inc.

**more stuff in one place.
more time and profit for you.**

Horizon has all the products and services you need for landscape installation, maintenance and golf. From irrigation to fertilizers, power equipment to lighting, pond supplies to tools, seed to sod, we stock it all at a fair price everyday. And the benefits of buying all of this from one supplier are simple: saves you time, reduces your cost of doing business, and helps you operate more efficiently. That means higher profits for your business. Stop by one of our 40 stores today and see the Horizon difference for yourself.

Bob Tiglio, Hydro-Scape Founder, Passes Away

Robert J. (Bob) Tiglio, Chairman of the Board and Founder of Hydro-Scape Products, Inc., passed away peacefully in his sleep Dec. 12, 2005, at the age of 73. He had been dealing with health problems over the last 15 years, ever since having a stroke, yet his death is still a shock to those who knew and loved him.

Bob became a pioneer in the landscape irrigation industry in the early 1950s. He was a respected irrigation contractor who specialized in large commercial projects and

golf course construction throughout the Southwest and Hawaii. In 1975, Bob changed gears and moved into the wholesale distribution of irrigation and landscape supplies with the establishment of Hydro-Scape Products, Inc. His original concept of the company, which continues today at its 19 full-service locations throughout Southern California and Hawaii, was to provide full-service and supply facilities for irrigation and landscape contractors, all under one roof.

In lieu of flowers, the Tiglio family has requested that donations be made to Cuyamaca College, attention: Robert J. Tiglio Scholarship Fund, 900 Rancho San Diego Parkway, El Cajon, California 92019, for students in the college's acclaimed Ornamental Horticulture program.

Bob Tiglio

Falleció Bob Tiglio, Fundador de Hydro-Scape

Robert J. (Bob) Tiglio, Presidente del Consejo y Fundador de los Productos Hydro-Scape Products, Inc., falleció pacíficamente mientras dormía el 12 de Diciembre del 2005, a la edad de 73 años. Bob venía padeciendo problemas de salud durante los últimos 15 años.

Bob fue uno de los pioneros de la industria de la irrigación en los años 50. Logró hacerse de una reputación impecable en la industria especializándose en grandes proyectos comerciales, y campos de golf a lo

largo del sudeste del país y Hawaii.

En 1975, Bob decidió salirse del negocio de ser contratista para dedicarse a la distribución con el establecimiento de Hydro-Scape Products, Inc. Su concepto original de compañía, que hoy en día continúa, fue el de proveer un almacén con servicio completo y de abastecimiento de partes para la industria de riego y jardinería

paisajística. Hoy en día, los productos Hydro-Scape es el líder en la industria con 19 sucursales que brindan un servicio completo en la sur de California y Hawaii.

En lugar de flores, la familia Tiglio ha pedido donativos para Cuyamaca College: Robert J. Tiglio Scholarship Fund, 900 Rancho San Diego Parkway, El Cajon, California 92019.

Go the extra mile.
Introducing the EZ Pro Xtra!

8701 Sensor **8701 Control Box**

- Easily adapts to any time-based controller!
- Measures the absolute water content of the soil by taking 3 independent readings— soil moisture, soil temperature & soil conductivity!
- Quick & easy installation!
- Results in water savings up to 30%!

"MARCIE, WE NEED YOU!"

Thoughts from a letter by Don Phelps, City of La Habra

Sept. 15th, day of magic at the Irrigator Tech Trade Show, was on. My co-worker Jesse Esqueda and I arrived around 8 a.m. to find that our names were not listed at the reception table. That's when I said, "Marcie, we need you." Marcie came through for us (as always) and assured that our names were supposed to be listed.

We placed our raffle tickets in the right boxes in hopes to win one of the great prizes that were offered. With that done we set out to take in everything that we could. I knew this one was going to be bigger and

better because the show was at the Chino Fair Grounds. Every year I say, "This can't get any better," but it does.

We quickly found new products that make our jobs easier, and new information we can take back with us and use for the benefit of our companies and our customers. There is always something new to be learned, especially from folks like Curt Bruce from Hunter. I've been doing this job for over 30 years, and I'm always learning.

Thanks to Richard Daigle for the wonder-

Marcie Daigle (left) discusses day's events with raffle committee chair Lisa Dillon.

ful message giving homage to one of the greats in our profession, Dr. Joe VT Hung. I did miss the Daigle Dunk Tank, however. Maybe it will be at the 2006 Trade Show. And let's not forget this very important message as I close: "MARCIE, WE NEED YOU!"

¡MARCIE, TE NECESITAMOS! *Pensamientos de Don Phelps, del la Ciudad de La Habra*

El día mágico fue el 15 de Septiembre, la gran feria estaba llevándose a cabo. Mi compañero de trabajo Jesse Esquerda, y yo arribamos eso de las ocho de la mañana.

Nos abrimos paso hacia la mesa de entradas y fue entonces cuando le dije, "Marcie, te necesitamos," porque nuestros nombres no estaban en la lista. Marcie Daigle se acercó a nosotros y me aseguró que nuestros nombres estaban listados. Así que entramos.

Nosotros sabíamos que este sería un gran

día, y que la feria iba a ser grande por las dimensiones del predio ferial de Chino. Cada año me decía "Esto no puede ponerse mejor," pero la gente de Irrigator Tech siempre encuentra la manera de superarse a sí mismos cada año ofreciendonos pasar un tiempo maravilloso y una experiencia inolvidable.

Muy pronto encontramos nuevos productos que pueden hacer nuestro trabajo más fácil. Siempre uno tiene nuevas cosas que

aprender; nuevos productos para probar. Yo he estado haciendo este trabajo por más de 30 años y siempre aprendo algo nuevo.

Yo debo de remarcar a Richard Daigle por el extraordinario mensaje dado en homenaje de uno de los grandes de nuestra profesión: Dr. Joe Yi Hung. Y tengo un mensaje realmente importante para su bella esposa: "MARCIE, TE NECESITAMOS."

Irrigator Tech & Weathermatic Team Up to Offer SmartLine Certification

Weathermatic is working with Irrigator Tech to offer SmartLine Certification classes to Irrigator Tech's growing membership. SmartLine is the family of water management products offered by Weathermatic to bring automated, on-site water management using the industry's leading controller technology at a price that is affordable for every property.

The SL1600 Controller and SLW20 On-site Weather Monitor won the International Irrigation Association New Product Contest for the industry. The SL1600 controller features include industry firsts and breakthroughs including a Built-In Valve Locator,

Onboard Volt/Amp Meter, Run/Soak Cycles, and Seasonal % Adjustments by Month.

Weathermatic is offering product rewards such as a free SL1600 controller with the purchases of an SLW20 weather monitor for Irrigator Tech members who are SmartLine Certified. Richard Daigle of Irrigator Tech notes, "I always encourage our members to stay ahead of the pack, and water management tools like SmartLine are the future of our industry." Sign up for one of these special classes today.

Irrigator Tech y Weathermatic Ofrecen la Certificación SmartLine

Weathermatic está trabajando con Irrigator Tech para ofrecer las clases de Certificación SmartLine a los miembros de Irrigator Tech. SmartLine es una línea de productos inteligentes para la administración del agua que es ofrecida por Weathermatic; trayendo automatización e implemente el concepto de administración in-situ del agua, usando la tecnología punta disponible en el mercado pero a precios asequibles.

El Controlador de Riego SL1600 incluye novedades y avances incluyendo un Localizador de Válvulas incorporado, Voltímetro y Amperímetro de abordó, Ciclos Avance/Remojo, y permite realizar Ajustes Estacionales Porcentuales por Mes.

Weathermatic está ofreciendo premios como un controlador SL1600 gratuito con la compra del monitor de irrigación SLW20 para los miembros de Irrigator Tech que sean SmartLine Certificados. Reserve su espacio en las clases hoy.

Irrigation Hall of Fame In Organization *Joseph You-Tsai Hung Is First Honoree*

The Landscape and Irrigation Hall of Fame has recently been organized by Irrigator Technical Training School. In conjunction with landscape professionals, Green Industry leaders, and lifetime achievers the Landscape and Irrigation Hall of Fame is the first ever historical organization showcasing the history of the landscape and irrigation industry. In honoring all those individuals who have made a significant impact to the growth and future of the industry, we would like to acknowledge

Joseph You-Tsai Hung as our first inductee. Although the Landscape and Irrigation Hall of Fame Foundation fairly new still in organization, we are putting out a call to action for anyone that may have any resources to historical pieces or information. We would appreciate any donations to support our effort. We are also looking for seasoned professionals to volunteer and be on the Landscape and Irrigation Hall of Fame Committee. Please contact Irrigator Tech at (866) 614-1755 or email

jamesh@irrigatortech.com with any details. In addition to Joseph's Induction at our Trade Show last fall, we are currently building a Landscape and Irrigation Hall of Fame Website. This historical site will include products, companies, achievements, and individuals that have made a significant contribution to the industry. All aspects of the landscape and irrigation industry will be included. We need your help in collecting photos, documents, and products pertaining to the landscape and irrigation industry.

Sala de la Fama para el Paisajismo y la Irrigación

La Sala de la Fama en Paisajismo e Irrigación ha sido recientemente organizada por Irrigator Technical Training School. Se trata de un emprendimiento realizado gracias a la colaboración de un conjunto de profesionales en el paisajismo, líderes de la industria verde, y los triunfadores de toda una vida de trabajo que han logrado dar a luz a esta Sala de la fama en Paisajismo e Irrigación. Esta Sala de la Fama tiene como objeto el de honrar a todos aquellos que contribuyeron con su historia

dejando una huella en el crecimiento en la industria. Por ello esta Sala de la Fama reconoce a Joseph You-Tsai Hung como uno de los primeros colaboradores de éste fenómeno. En adición también estamos construyendo el sitio web de la Sala de la Fama. Por supuesto que la Fundación de la Sala de la Fama del Paisajismo e Irrigación es algo reciente y aun está organizándose. Por ello mediante esta nota estamos llamando a

colaborar a cualquiera que pueda poseer una pieza de información histórica, que puede incluir fotos, documentos y productos, para que sea parte de este proyecto. Vamos a aceptar con muy buen grado todo donativo, ya sea en tiempo, dinero o recursos, que pueda beneficiar a la historia de la irrigación. Por favor contactarse con Irrigator Tech al (866) 614-1755 o mandenos un e-mail al jamesh@irrigatortech.com con todos los detalles.

THE IDEAL 8-30'

slope solution

ANTI-RUNOFF / ANTI-WASTE

The wind-resistant, multi-trajectory streams of the MP Rotator® make it the ideal sprinkler for slope applications. MP Rotators deliver high-uniformity and a low application rate in a way that is more wind-resistant than conventional sprinklers — especially after radius reduction. In addition, you can install any MP Rotator on inexpensive ½" shrub adapters or 12" pop-up spray head bodies with built-in check valves. Either way, that saves installation costs when compared to shrub and high-pop rotors. Better performance, lower cost and significantly less water waste. That's what you can expect from the MP Rotator on your next slope job. *Save water, solve problems.*
